I enjoy solving business problems with software and learning about new web technologies. I've worked with talented teams to develop web applications using Ruby, Rails and JavaScript.

Experience

Grok Interactive
2014 - present
www.grok-interactive.com

As the lead Ruby developer at Grok Interactive, I lead several web application projects where responsibilities include client communication, designing core application architecture and leading the overall direction of the development process.

CollegePlus
2011 - 2012, 2013 - 2014
www.collegeplus.org

Software developer responsible for developing and maintaining a system of Rails applications to manage college student records and grades, and provide study and learning tools.

RoleModel Software
2012 - 2013
www.rolemodelsoftware.com

Software developer on a cancer decision support system for Congruent Systems, a health-IT startup acquired by Mckesson. The development of the system was led by Vermonster, a software consultancy based in Boston, MA.

Education

Bachelor of Science in Business Administration, Computer Information Systems
Thomas Edison State College
2010 - 2014
